

NATURAL ANAMORPHOSIS PROCESS

Alexandros Senarelis Sinaris

Doctor of Naturopathic Medicine, Greece

Abstract

Natural Anamorphosis Process' non-invasive, non-forceful, non-dynamic natural way of approach, innocuous neutral behavior, omnidirectional-independent character (health-development oriented) and centrifugal-orbital tactic (detached from the origins of impediment, the roots of disorder and the sources of malfunction) has been applied to various cases such as: GMFCS level 5 cerebral palsy (CP), near death traumatic brain injury (TBI) with complete loss of vision-orthopedic deformities- schizophrenia and epileptic seizures history, congenital heart disease (CHD) with increased Cobb curvature angles measurement scoliosis and intellectual disability, chronic obstructive pulmonary disease (COPD), extended hepatic tissue deterioration- hepatic blood flow (HBF) decrease and steatosis from alcohol addiction, benign prostatic hyperplasia (BPH) with secondary lower urinary track symptoms (LUTS), blood cells and iron level irregularities, chronic back pain accompanied by sciatica due to vertebral column & intervertebral discs degeneration, femoral head avascular necrosis (AVN), extended squamous cells skin necrosis (undiagnosed or neglected Bowen's disease?), Legg-Calve- Perthes disease, complex fractures, chronic fatigue, overuse syndromes, migraines, tinnitus, eyes-visual anomalies, oxidative stress and consequential irritation of the digestive track in general food intolerance symptoms, post- surgery subdural brain hematoma. N.A.P's methodology has been also offered to the social services of the public sector as a parallel system of approach regarding autistic children and drug addicts.
